Summary

Full Stack Developer with 3+ years building end-to-end products across the .NET and JavaScript/TypeScript ecosystems — ASP.NET Core 8, Clean Architecture, CQRS, and React + TypeScript SPAs on Node.js/Express. Experience spans enterprise dashboards, a production job-aggregation platform, and technical modeling software for the green-hydrogen sector. AI-empowered developer; BS Computer Engineering (Bahauddin Zakariya University).

Education

Bahauddin Zakariya University BS • 3.1
Computer Engineering Oct 2019 - May 2024

Experience

DevMechanix Islamabad, Pakistan
Software Engineer Dec 2025 - Present

- Built the WFP Management Dashboard for the Benazir Nashonuma Programme: ASP.NET Core 8, Clean Architecture, CQRS, EF Core on Oracle 19c, Razor Pages with interactive Leaflet maps.
- Implemented OAuth-based role, permission, and group access control with multi-tenant understanding; owned IIS deployment.
- Sole developer of a confidential client application: NestJS monorepo with Passport JWT auth, Drizzle ORM on PostgreSQL, BullMQ/Redis job queues.
- Built the frontend as a React 19 + TypeScript SPA on Vite with Tailwind CSS and MapLibre GL interactive maps.
- Continue to maintain HealthJobsIndex and AutoPost.

DevMechanix Islamabad, Pakistan
Junior Software Engineer Jan 2025 - Nov 2025

- Built AutoPost, an AI-assisted resume builder, LinkedIn profile-improvement tool, and post scheduler, as a pnpm/Turborepo monorepo.
- Built the API with Express and Passport JWT, a standalone mailer service, and a React + Vite web UI.
- Modeled data with Drizzle ORM on PostgreSQL (Supabase); began building and maintaining HealthJobsIndex.

DevMechanix Islamabad, Pakistan
Intern Software Engineer Oct 2024 - Dec 2024

- Contributed to Write Engine, an AI-first tool for generating job proposals, cover letters, and content humanization.
- Built the frontend with Vue 3 + Vite and the backend with Laravel (PHP); contributed to n8n workflows driving the AI content-generation pipeline.

Fiverr Multan, Punjab, Pakistan
Freelance Software Engineer Jan 2024 - Dec 2025

- Delivered custom .NET and web solutions for international clients across desktop and web.

- Held a multi-year agreement with a US client (SiiSol) to build their Techno-Economic Analysis software suite.
- Engagements ranged from short tasks to long-term contracts across financial and technical modeling.

Binary Bridges

Multan, Punjab, Pakistan

Dotnet Developer

Apr 2023 - Dec 2023

- Built an oil-distribution web application (Ahmed Shah & Co.) with ASP.NET MVC, ASP.NET Web API, and EF Core over MySQL.
- Built a fintech NDA platform authoring pure MS SQL queries and .NET Web APIs for a money-flow system using ADO.NET.
- Used dependency injection and Microsoft Identity for authentication and user management.

Projects

HealthJobsIndex — Healthcare Job Aggregation Platform

Dec 2024 - Present

- Architected a semi-microservices monorepo (API, mailer, scraper) with n8n-scheduled scrapers and a subscriber email-alert pipeline.
- Built a public React + TypeScript (Vite) SPA with an admin panel for user, job, and dynamic-filter management.
